---

Then, you can continue to type Chinese characters directly in the document, select the characters using the popup box from the text as you like. Please refer to this tutorial: [Zawgyi-One on Win7](#) (applies to older versions of Windows as well). If you see the red triangle box and error , it means you need to install the Chinese font. A: This is what I do. I have Zawgyi-One installed on my system and it has been working fine ever since. Open notepad. Click on the "View" tab, go to "Text Size" option. Select "Medium" and click on OK. Save your document as UTF-8 with .txt extension, even if you are using MS Word/open office. Make sure you have the Zawgyi-One as the default font in the "Fonts" option in notepad. In case you have a selection of fonts. Open the document in MS Word/Open Office and you will see your text in your Zawgyi-One font. Note: if you are having issues with the size of the Chinese characters on screen, like what @harryjackson is saying, double check this setting. This will be the case for Chinese characters or any characters with Hanyu Pinyin like the Hanzi or Wubi. However, if you are having issues with Hangul, it is not a Zawgyi-One issue. Another important note for other users having issues with the fonts on screen, if the text in the Zawgyi-One font is not in a box, like a bullet, or maybe in a piece of code, its size is not being computed correctly. Make sure the text is fully visible on the screen to be sure it is being shown correctly in the Zawgyi-One font. that the non-frivolous nature of the claimed error was apparent on the face of the record. Id. "This Court's review of the trial court's assessment of the likelihood of success of the claim shows that it did not conduct the analysis required by Evans." Id. 82157476af
